

`public static void main`

`import scanner`

Set1 Prob 3

Ask `scanner`  
to get an  
`int` (w/print)

print "Here  
are your  
numbers:"

for

make `int i`  
equal to 1

run if `i` is less  
than/equal to 12

change `i` by +1 every  
time loop finishes

print `scanner num.`  
times `i` (times loop ran)

END
